

3 229 Skyline Drive | Francis Creek

Reindl Builders welcomes you to one of our two entries for the 2010 Parade of Homes. This home features 2281 sq. ft on the first floor and 500 sq ft on the lower level. The home owner chose a unique color palette on their hardwood flooring and trim work that is a must see. The master bath features unique tile work in the walk-in shower and a Jack-and-Jill bathroom joins the other two bedrooms. We would like to extend our thanks to the sub contractors for all of their hard work in this custom home and especially the homeowner for allowing us to view their home in this year's Parade of Homes.
