Patios, Plants and an update on Emerald Ash Borer

Presented by: Jerry Haupt, Lakeland Landscape Services

Learn from Jerry's expertise about patios and plants. Also what possible effects the Emerald Ash Borer could have on Manitowoc County and treatments available.

Sunday April 18 2:30pm

Home Energy Retrofits-Your Personal Gold Mine

Presented by: Kevin Hogan, Technical Coordinator Home Performance with ENERGY STAR, Wisconsin Energy Conservation Corporation

This presentation provides information regarding the generous Cash-Back Rewards from Focus on Energy (strictly for customers in Wisconsin) and the current Federal Energy Tax Credits that are available for homeowners through December 31, 2010. The Focus on Energy program for existing homes, Home Performance with ENERGY STAR® will be highlighted as the vehicle that takes homeowners into their individual “mines.”

This program features independent consultants providing home performance testing and evaluation, followed with detailed written reports and recommendations. After improvements are completed, a return visit/test is conducted by the consultant. There is no additional charge for the return visit. This visit verifies the work performed and is necessary to qualify for any/all Cash-Back Rewards. In a nutshell, this evaluation is a gateway to improved home performance, combustion safety, comfort, and Cash-Back Rewards
